OpenTherm

GATEWAY

THERMOLINK

Stay Connected - Wherever You Are

Quick Start Guide

PART 1 Installing Device

1 Unpack the device

Package includes:

- Thermolink Unit
- 5V wall charger
- USB cable
- OT terminal connector and cable
- Mounting screws
- Double-sided adhesive pad

Inside the box you will find a label showing your claim code (TL-XXXXXXXX) and its QR code - set this aside for PART 2

2 Switch off the boiler

Turn the boiler off at its power switch before making any connections

PART 1 Installing Device

3 Choose a location and mount device

- Select a flat, dry surface within cable reach of both the boiler's OpenTherm terminals and a main socket for the charger.
- Mount the Thermolink using *screws* for fixing to the wall or *adhesive pad* for fixing to the boiler casing or a smooth wall

4 Connect to the boiler

Wire the Thermolink to the boiler's OpenTherm terminals using providing cable. OpenTherm bus is polarity free.

5 Power the device

Plug the device into a main socket using the supplied 5V charger.
2 indicator light confirm a successful start-up:.

- *light* turns on and stays solid, showing device has power:
- *light* begins to flash, showing the device is ready for WI-FI setup

PART 2 Getting Connected

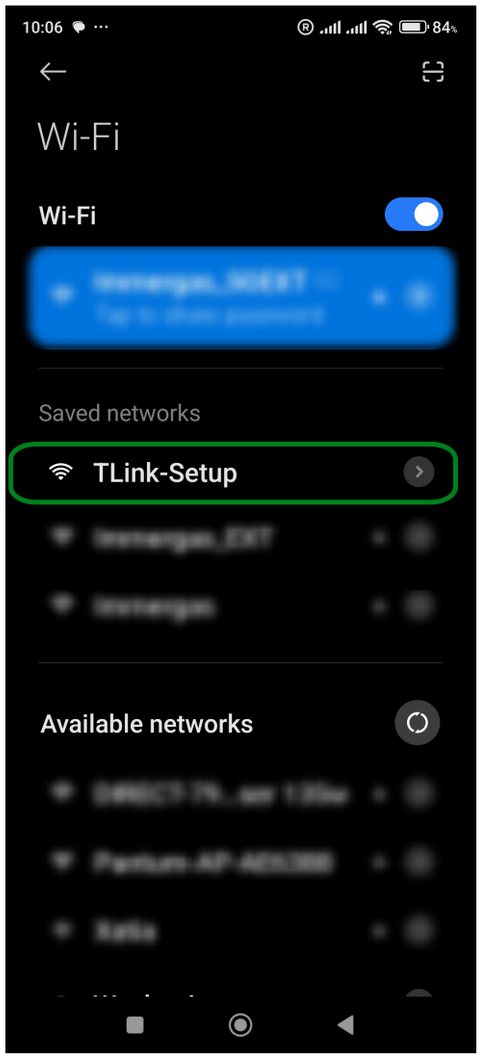

1 Connect phone* to the Thermolink

On your phone open Settings => WI-FI and look for the network named **TLink-Setup**

If you don't see it straight away, wait a few seconds and let the list refresh. If it still hasn't shown up, switch your phone's WI-FI off and back on once or twice; the network will then appear.

Once it does, tap to connect.

This temporary setup network has no internet access - that is also normal.

PART 2 Getting Connected

2 Setup Page

Once your phone* joins TLink-Setup, the Setup Page opens on its own.

If it doesn't appear, open your phone's browser and it will load.

Tap CONNECT TO WIFI. If the network list doesn't appear, tap CONNECT TO WIFI again - device needs a moment to scan for nearby networks.

PART 2 Getting Connected

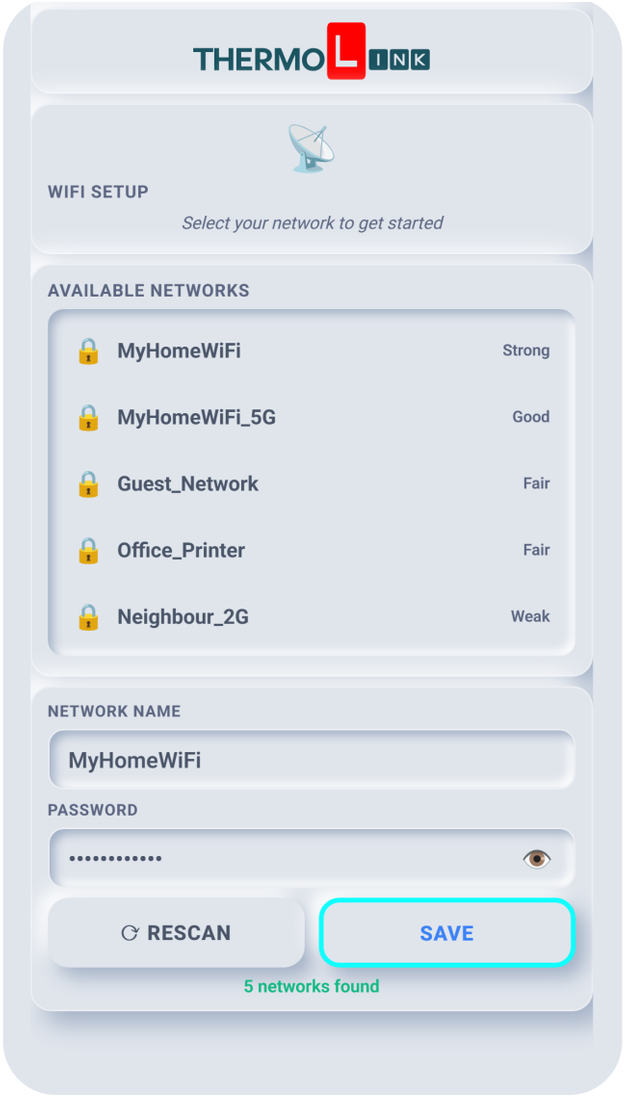

3 Choose Your Wi-Fi Network

Tap the network field and choose your home Wi-Fi network from the list (or type its name)

Enter your Wi-Fi password in the field below

Tap the eye icon to reveal password and check it - Wi-Fi passwords are case sensitive.

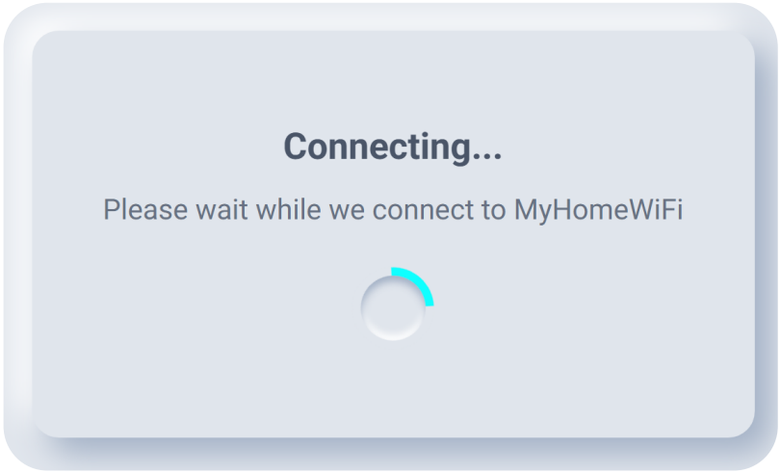

When it's correct, tap SAVE

PART 2 Getting Connected

4 Connection

The page shows Connecting.... while Thermolink joins your network. If you see Wrong Password, try again and re-enter your Wi-Fi password.

After a few seconds it turnes green - Connected.
On the device, blue Wi-Fi light stops flashing and stays solid.

Thermolink is now online and you can close the page.
